The firm of P. B. Mingle Co. has been engaged in the seed business in the same building, No. 103 Market Street and No. 4 North Front Street, uninterruptedly, since 1837, and is well known among its patrons as headquarters for Clover, Grass and Vegetable Seeds; Bulbs, Roots and Plants; Poultry, Farm and Garden Supplies, being one of the largest handlers in this State.

Strict personal application to the details of so large a business has earned them a valuable reputation as thoroughly reliable seedsmen, whose representations as to the quality of the goods they offer can implicitly be relied upon.

General Directions to Customers

The attention of our Customers is respectfully called to the following directions, which will if followed, be an aid to purchasers as well as ourselves.

ORDER EARLY

We aim to execute all orders as soon as received, but during the rush season in April and May, delays are unavoidable, which, however, can be largely overcome by our patrons anticipating their wants and ordering and taking delivery of their requirements early.

USE THE ORDER SHEET

Please remember to write on each order your Name, Post-Office, County and State, also give number of street or P. O. Box as distinctly as possible; also, the Nearest Express Office, or if on a stage route, send us special directions, giving us the name of the Express Company delivering goods.

TERMS OF SALE

Cash With Order.—Please send money with the order sufficient to cover the whole bill.

REMITTANCE

Should be made by Post-office Money Order, Drafts on Philadelphia or New York Banks, or Express Money Orders. We disclaim all responsibility when remittances are not made as above directed. Where it is not possible to obtain these, the letter should be registered. Postage stamps will be found a convenient method of remitting for small amounts, and can be used by us to advantage. Coin should not be sent by mail.

PERSONAL CHECKS

From unknown patrons will be cashed before order is executed.

PROMPT ATTENTION

Anticipating the wishes of our customers, we give orders our prompt attention on the day they are received, and if for any reason delay is unavoidable, we send prompt notice.

SHIPPING INSTRUCTIONS

Always state by what method you want goods forwarded, otherwise we will ship according to our best judgment.

PARCEL POST

Please include parcel post charges, if goods are desired shipped by this method, where remittance accompanies the order. Peas, Corn and Beans add 8 cents per pint, 10 cents per quart, to cover postage.

PARCEL POST RATE

Packages of 70 lbs. and under can be sent by parcel post. Postage in first parcel post zone (50 miles) is 7c. per lb., and 1c. extra for each additional pound. In second postal zone (150 miles), 7c. per lb., and 1c. extra for each additional pound. When, owing to bulk or weight, seeds cannot be sent by mail, we deliver free to express or freight stations in Philadelphia, the purchaser paying all other transportation charges.

C. O. D. SHIPMENTS

Goods can be sent C. O. D. (with the exception of perishable items). No C. O. D. shipments for any kind of goods can be made by express or parcel post unless a partial remittance of 25 per cent. of their value accompanies the order.

NON-WARRANTY OF SEEDS

It is a well-known fact that unfavorable weather (cold and wet, or hot and dry) has an unfavorable bearing on the germination of seeds, causing partial or complete failure of the crop; or the seeds may be, and frequently are, destroyed by insects of various kinds; therefore, while we exercise the greatest care to have all seeds pure, reliable and true to name, our seeds are sold without any warranty, expressed or implied, and without any responsibility on our part as to result of crop. If the purchaser does not agree to these terms the seeds are at once to be returned to us.

Mulford Cultures contain pure, tested strains of active, vigorous nitrogen-fixing bacteria, for inoculating seeds of legumes or soil.

Mulford Cultures are scientifically prepared and tested with the utmost care and skill. Enormous numbers of these very valuable and desirable bacteria are thus available to you in every package of Mulford Culture and may readily be applied to your seed. The sealed bottle insures purity.

Legumes offer the best-known means of maintaining soil fertility and rejuvenating over-cropped and worn-out fields. They add both humus and nitrogen to your soil and thus increase your yield of wheat, cotton, corn and other non-legume crops.

The U. S. Department of Agriculture and many State Agriculture Experiment Stations recommend inoculation of legumes with nitrogen-fixing bacteria to induce a prompt "catch" and increase your yield.

Mulford Cultures are scientifically prepared and tested by experts in the biological laboratories of H. K. Mulford Co., Philadelphia, U. S. A., with the same degree of care as Mulford Antitoxins, Serums, Vaccines, etc., which are standard all over the world.

Always specify on your order what crop you want to inoculate, as there is a different strain of bacteria for each legume.

SOY BEAN

Alfalfa plant on left not inoculated. Plant on right inoculated with Mulford Culture for Alfalfa. All other conditions identical. This contrast speaks for itself.

Barley.

Broom Corn—Early Evergreen.

Buckwheat (Japanese).

* Canada Field Peas.

CLOVER SEEDS

* Alsike Clover.

* Alfalfa. Alfalfa is the most talked of and most widely planted of all the varieties of clover in the world.

* Crimson or Scarlet Clover.

* Medium, or Common Red.

* White Blossom, Sweet Clover or Bokhara.

White Dutch Clover.

Cow Peas

Cow Peas. The Southern Cow Pea (in reality a bean) has been cultivated in the South for many years, but only in recent years has it been demonstrated that most all varieties are adapted to cultivation throughout the entire United States. They now are one of our most valuable farm products.

As a fertilizer they come next to clover, to be plowed under when they commence to blossom; they will grow on land that will not produce clover.

Millets

Millet—Golden Millet.

Millet—Hungarian.

Millet—Japanese, or Barnyard.

INOCULATE THIS
SEED WITH
MULFORD CULTURE

Oats—Welcome. Very plump, heavy grain, and close husks. In favorable seasons they will weigh from 40 to 45 lbs. per bushel. This variety grows from 5 to 6 feet high in rich soil and cool locations. The heads branch freely on all sides, and are from 16 to 22 inches in length. The straw is straight.

Wheat.

Kaffir Corn.

Rye—Spring.

Rye—Winter.

Rape—Dwarf Essex. This plant is one of the most valuable forage crops ever introduced into this country and is highly recommended for succulent forage from early Spring to the Winter months. For sheep, swine or poultry it is unexcelled. The feeding value is very high; it is a great fatterener.

Sorghum—Early Amber.

Soy Beans.

Timothy.

* Vetch—Winter—(Vicia Villosa, Sand or Hairy Vetch). Natural Grasses

Kentucky Blue Grass.

Meadow Fescue.

Hard Fescue.

Orchard Grass.

Creeping Bent.

Herd or Red Top.

Red Fescue.

Sheep's Fescue.

Italian Rye.

English or Perennial Rye Grass.

Sudan Grass.

MINGLE'S LAWN GRASS SEED

Mingle's Finest Velvet Lawn Grass. The making and keeping of a lawn depends largely upon the thorough preparation of the soil before the seed is sown, as a good soil foundation is one of the essentials. The soil should be well drained and the top soil should be worked to a depth of 4 to 6 inches and none of the sub-soil brought to the surface. Work it thoroughly with a fine steel rake or fine-toothed harrow, crossing and recrossing to obtain as fine a tilth as possible. After sowing gently rake seed in, following with roller, in order to compact the soil around the seeds to promote better germination.

If grading is necessary to secure an even surface, first remove and afterwards replace the top soil after the grading is completed. Tree and shrub planting, and laying out flower beds, should be done first. Lawns properly cared for, well fertilized and kept closely mowed, will improve year after year. Weeds should be removed as far as practicable, before sowing. Lawn grass, to produce a succession of verdure, must naturally consist of a mixture of several grasses, as some are more luxuriant in the Spring, others in Summer, and others again in Autumn. A proper combination of these various sorts is required to create and maintain a perfect, carpet-like lawn, and such is **Mingle's Velvet Lawn Grass Mixture.**

Sow 1 quart of seed for space 10 x 30 feet. Four to five bushels are required for one acre.

Pt., 20c.; qt., 35c.; 2 qts., 65c.; 4 qts., \$1.25; pk., \$2.25; bushel (20 lbs.), \$8.00.

Fairmount Park Lawn Seed. A mixture meeting the requirements of those desiring a moderately priced grass seed. 20 lbs. per bushel.

Pt., 15c.; qt., 30c.; 2 qts., 55c.; 4 qts., \$1.05; pk., \$2.00; bushel, \$7.00.

Shady Lawn Grass. On many lawns are bare spots under the shade trees. Such spots are frequently sour, perhaps covered with a green scum or moss. In such cases apply hydrated lime, which is powdered fine, at the rate of one bushel per thousand square feet, removing all moss or scum first and then loosening the soil in same manner as already prescribed for regular lawn making. Our mixture of grass seed for shaded spots is one best adapted to the requirements of much shaded lawns and will grow perfectly where ordinary grass mixtures would fail. Sowing instructions same as for Velvet Lawn Grass.

Pt., 25c.; qt., 40c.; 2 qts., 75c.; 4 qts., \$1.40; pk., \$2.50; bushel (20 lbs.), \$8.50.

Golf or Putting Greens Mixture. Our mixture of this grass is giving the best of satisfaction, being composed in proper proportions of the hardy and dense growing kinds best adapted for the purpose, standing heat and drought well and of deep rooting varieties which stand the wear and tear.

Pt., 35c.; qt., 65c.; 2 qts., \$1.15; 4 qts., \$2.25; pk., \$4.00; bushel (20 lbs.), \$15.00.

Terrace or Embankment Grass. Ordinary lawn grass will not hold the soil on terraces and embankments, which require a thick turf, composed of varieties which make strong roots to take hold of the soil and prevent washing by heavy rains. Our Terrace Grass is a carefully prepared combination of such grasses as will fill the requirements by making a quick growth of grass which will form a strong mat and present a good appearance. It will grow well anywhere, but it is best to enrich the soil, in order to provide nourishment to the young roots and give a vigorous start to their growth.

Pt., 40c.; 2 qts., 75c.; 4 qts., \$1.40; pk., \$2.50; bushel (20 lbs.), \$8.50.

Old English Lawn Grass. This is the grass "par excellence" for lawns, making a fine close surface of dark green velvety color. It is very sensitive to good treatment, and will in most cases drive out the other grasses and take possession of the soil. Should be sown not less than four bushels per acre.

Pt., 15c.; qt., 25c.; 2 qts., 45c.; 4 qts., 85c.; pk., \$1.50; bushel (20 lbs.), \$4.40.

White Clover. Excellent for use on lawns; forms a close herbage and remains green throughout the season. We furnish the choicest grade of seed. $\frac{1}{4}$ lb., 25c.; $\frac{1}{2}$ lb., 45c.; 1 lb., 85c.; 5 lbs., \$3.50.

Seashore Lawn Grass. A rich, green lawn is especially desirable at the seashore, but unless the right mixture of grasses and clover are used the result will be disappointing. Our Seashore Lawn Grass is composed of strong-rooted varieties which quickly produce a good turf. In preparing the land it should first be top-dressed with about four inches of good soil, as grass will not grow well in sand, but the seeds will quickly germinate in the top-soil and make strong roots, which reach down into the sand for moisture. In order to keep the seaside lawn in good condition it should be watered liberally every evening and also have an occasional application of pure Bone Meal in order to keep up a vigorous growth. Qt., 35c.; 2 qts., 65c.; 4 qts., \$1.25; pk., \$2.25; bushel (20 lbs.), \$8.00.

Pasture Grass Seed (for permanent pastures). Having given our attention to grasses for this purpose for many years, and after practical results and experience, we have succeeded in creating a mixture which we can highly recommend.

If there is any land you wish to set in permanent pasture, we can supply you with a mixture of any description required or a special mixture admirably suited for this purpose at a very reasonable cost. We are headquarters for all kinds of grass seeds and can save you money on your purchases. Of the ingredients in it, the Timothy and the Clovers come right along and give some feed the year of sowing and a good deal of it the next year, while it isn't till that year that the Blue Grass begins to show. But where the Red Clover begins to disappear and the Timothy gets thin the Blue Grass is just setting up in business and the other grasses are not missed. And when established the Blue Grass is a stayer, and it and the White Clover, which also sticks, makes a combination that is all right.

Sow 2 to 3 bushels per acre. **Per bushel (20 lbs.) Market Price.**

Hardwood Ashes. This is also a splendid fertilizer for the lawn and garden, containing all of the fertilizing elements except nitrogen. If used on the lawn at the rate of a ton or more per acre as a first application, and an annual dressing of three hundred pounds afterwards, will insure a thrifty growth of dark color, and freedom from weeds.

Price, 25 lbs., 75c.; 50 lbs., \$1.35; 100 lbs., \$2.50.

Caudatus. (Love Lies Bleeding.) Rapid growing garden annual with long drooping crimson racemes. Height, 3 feet. Pkt., 10c.

Tricolor. (Joseph's Coat.) Foliage curiously variegated with bronze, green and scarlet. Very striking as a border or for center of beds. Pkt., 10c.

ASTERS

(King)

Similar in habit to the late branching Asters but producing a little earlier very large double blossoms of distinct form, many of the petals being rather narrow and slightly quilled and curved. The inner petals are incurved, covering well the center. The plants are large and vigorous with long strong stems. Finest Mixed. Pkt., 10c.; $\frac{1}{4}$ oz., 50c.; oz., \$1.75.

(Queen of the Market)

Very desirable on account of extreme earliness as well as profuse blooming and wide range of colors. The plants are of somewhat compact but branching habit, rather open and spreading, about sixteen to eighteen inches high, bearing on long stems from ten to fifteen finely-formed double flowers of medium size. The blooms, although rather flattened and not so large as those of the late sorts, are fine for cutting and this class is used extensively for growing under glass. This class is known also as Queen of the Earlies.

INSECTICIDES AND FUNGICIDES

Ansect (Rose Bug Destroyer). Highly effective when used on Rose Bugs, many hard-bodied insects, Red Spider, Mealy Bug and other garden pests. Use 1 part in 30-50 parts of water. Thorough spraying is essential. **Prices: 4 oz., 30c.; pts., \$1.00.**

Ant Killer. For use on lawns, sports turf, golf courses, etc. Sprinkle a small quantity of Key Brand Ant Killer around the ant hills. The ants carry the preparation into their hills where they eat it and die. A very small quantity will quickly kill an entire colony. **50c. each.**

* **Arsenate of Lead (Dry Powder Form).** Being the more popular form of this destroyer, owing to its economical ways of being applied (can be used either as dusting powder or diluted in water).

Price, ½-lb., 25c.; lb., 45c.; 5 lbs., \$2.00; 10 lbs., \$3.50.

* **Arsenate of Lead Paste.** Has attained a wide reputation as a reliable and economical insecticide and is particularly destructive to leaf-eating insects.

It is in paste form and should be sprayed in the proportion of 1 ounce to 1 gallon of water. **Lb. can, 40c.**

* **Black Leaf 40.** Is a concentrated solution of nicotine sulphate, is used as a safe and effective spray for plant lice; contains 40 per cent. nicotine by weight; can be combined and applied with other insecticides and fungicides. **Oz. bottle, 35c.; ½-lb. can, \$1.25; 2 lbs., \$3.50.**

* **Bordeaux Mixture (Powder).** The perfect Dry Bordeaux Mixture Concentrate is a dry powder, no danger of freezing, no freight to pay for water; use 8 pounds to 50 gallons of water. **Price, ½-lb., 25c.; lb., 40c.; 5 lbs., \$1.50.**

* **Bug Death.** It contains no Arsenic nor Arsenical poison of any name or nature. Does not harm birds, animals or foliage, no matter how freely it is applied. In addition to killing the bugs or germs and preventing blight, it nourishes the plant. **Lb. cans, 20c.; 3-lb. pkgs., 50c.; 5-lb. pkgs., 70c.; 12½ lbs., \$1.40.**

Calcium Arsenate. For spraying and dusting potatoes for bugs and fungus trouble. **½-lb., 20c.; lb., 35c.**

* **Cut Worm Killer.** The Cut Worm helps to make the cost of living higher. Use the means at hand to destroy this pest and get a good crop from your protected plants. Directions on 1 pound sprinkler boxes. **Price, 1 lb. box, 40c.**

Cyanogas. Kills rats applied to the rat holes, also moles. Ask for general rodent leaflet. **Price, 75c. lb. can.**

Fish Oil Soap. An old reliable remedy for spraying against scale and other pests. Can be used in varying proportions dissolved in water. **½-lb., 15c.; lb., 25c.; 5-lb. pkg., \$1.00.**

* **Hellebore.** One of the best insecticides for all around garden use. Destroys almost all leaf and flower-eating insects. **Price, ½ lb., 30c.; lb., 55c.**

* **Lime-Sulphur Solution.** A liquid preparation. Our brand stays in suspension perfectly; always ready for use. Directions: For destroying Scale, 1 gallon to 8 gallons of water; for destroying Fungus, 1 gallon to 35 gallons. **Price, qt., 45c.; 2 qts., 85c.; gal., \$1.15; 5 gals., \$3.75.**

Lime Sulphur (Dry Powder). Reduces the cost of spraying by fighting three different classes of pests and diseases with the same weapon at the same time.

It is used for the control of San Jose Scale, Oyster Shellback Louse and other Scale Insects; Apple Scab, Peach Leaf Curl and other fungous diseases; Pear Psylla, Leaf Blister Mite and Aphis.

It is put in air-tight cans, powder form, and will keep indefinitely. **Lb. can, 35c.; 5-lb. can, \$1.40; 10-lb. can, \$2.25; 25-lb. can, \$4.50.**

* **Paris Green.** The old time Potato Bug destroyer. **Price, ¼-lb. pkg., 20c.; ½-lb., 30c.; lb., 55c.; 5 lbs., \$2.50.**

* **Pyrox, Bowker's.** The one best spray for Apples, Potatoes and general purposes against leaf-eating insects and fungous diseases. A most popular combined insecticide and fungicide that sticks to foliage like paint in spite of heavy rains. Mix with cold water and it is ready to use. **Lb., 50c.; 5 lbs., \$1.75; 10 lbs., \$3.00; 25 lbs., \$6.25.**

P. T. B. Para Dichlorabenzine. A successful remedy for Peach Tree Borers. Directions with each package. **Per lb. can, 65c.; 5 lbs., \$2.75.**

Scalcide. For dormant spray. Dilute 1 gal. to 15 gals. of water. Spray during Winter or early Spring. **1 qt., 60c.; 1 gal., \$1.50.**

Sulfocide. A Better Summer Spray. A powerful summer fungicide for fruits, vegetables and flowers. Very superior for the control of apple scab, brown rot of peaches, and other serious diseases. It is as cheap as home-made bordeaux—one gallon makes 200 gallons of spray. **1 pt., 70c.; 1 qt., \$1.00; 1 gal., \$2.75.**

Slug Shot. A light, composite, fine powder, easily distributed either by duster, bellows, or mixed with water. Thoroughly reliable in killing currant worms, potato bugs, cabbage worms, lice, slugs, sow bugs, etc. Also strongly impregnated with fungicides. **Lb. carton, perforated top, 20c.; 5 lbs., 60c.**

* **Sulphur (Flowers).** **Price, lb., 10c.; 10 lbs., 80c.; 25 lbs., \$1.75.**

* **Sulphur Candles.** For fumigating. **¼-lb. can, 10c.; ½-lb. can, 20c.; lb., 30c.**

* **Tobacco Dust.** Used for dusting delicate plants, especially good for the soft shell pests which infest flowers. Also for all low growing or trailing varieties of vegetables. **Price, lb. pkg., 10c.; 5-lb. pkg., 40c.; 10-lb. pkg., 60c.** Larger quantities, price on application.

* **Tree Tanglefoot.** An absolute safeguard against all creeping insects on trees. Apply with paddle, making a band around the tree 3 inches wide. Vermin can not get over it. **Lb. can, 50c.; 5-lb. can, \$2.40.**

* **Weed Killer.** A scientific chemical which kills weeds and grass permanently, quickly, easily, cheaply. Gets down to the deepest root. Kills the weeds for the whole season. Used by thousands of people all over the United States.

One gallon of Weed Killer, diluted with 20 gallons of water and applied with an ordinary sprinkling can, will clean up 600 square feet—and keep it free from weeds for the whole season. **1 qt., 55c.; ½-gal., 90c.; 1 gal., \$1.75; 5 gals., \$6.50.**
